

SUMIT KUMAR

AI / Generative AI Engineer

Delhi, India | +91-7033241380 | sumit.kumar2201200@gmail.com | [linkedin.com/in/sumitkumar22](https://www.linkedin.com/in/sumitkumar22) | github.com/sumit22012004 | [Portfolio](#)

SUMMARY

AI Engineer with 2+ years building production Generative AI systems — multi-agent orchestration, RAG, computer vision and multimodal generation — for enterprise clients including **Mankind Pharma** and **Bharat Serums and Vaccines**. Owns delivery end to end, from requirement gathering with stakeholders to evaluation and secure deployment on Azure.

EXPERIENCE

AI Engineer — ThoughtSol Infotech Ltd., Delhi, India

Feb 2026 – Present

- **Built 3 production AI products end to end** for Mankind Pharma and Bharat Serums and Vaccines: gathered requirements with business teams, then designed, built, tested, released and monitored each product on a secure Azure setup (VNet, WAF, API Management, Key Vault, CI/CD).

Generative Media Studio

- **Cut marketing-creative turnaround from 3–4 days to seconds** by replacing designer and agency briefs with a self-serve studio for brand managers — GPT Image and Gemini image generation, Veo, Seedance 2.5 and Gemini Omni video, ElevenLabs TTS, ffmpeg assembly, and layout-preserving poster localization into Indian regional languages.
- Adopted by **244 users across all 16 Mankind Pharma divisions**; Azure-hosted Python backend serving **120 concurrent requests**.

Health-Camp Compliance Vision Engine

- **Automated manual review of doctor-hosted health-camp submissions** — every image in a submitted PDF is validated against **25+ business rules at ~4s per image** using GPT vision (Azure OpenAI), a custom Azure Vision model, Document Intelligence and identity / anti-tampering checks.
- Designed the evaluation and confidence layer (logprobs, self-consistency, deterministic checks) routing only low-confidence cases to human review — **88% agreement with human reviewers** on a 146-document ground-truth set; validated a production model migration on a **200-event benchmark** with division-level error analysis.

AI Survey & Market Research Platform — Bharat Serums and Vaccines

- **Eliminated 10–15 days of medical-representative survey training** — questionnaires are generated from study data (replacing days of manual drafting), and a LangGraph voice agent (ElevenLabs STT/TTS) runs doctor surveys with real-time streaming, barge-in and dynamic follow-ups, so reps need no training.
- Converts doctor-interview transcripts into structured, cumulative Excel reports, handling piped and matrix questions across survey instruments (FastAPI microservices on Azure).

AI Engineer — India Career Support (Freelance), Remote

Dec 2025 – Feb 2026

- Architected and shipped a production career-support assistant on a **hybrid RAG layer (Qdrant + MongoDB)** with a LangGraph/LangChain multi-agent workflow, delivered as FastAPI microservices on Azure Container Apps and Functions with CI/CD.

AI Engineer — AiRA, Bengaluru, India

Sep 2024 – Nov 2025

- Built and deployed end to end (backend + Azure infrastructure) a conversational AI platform where users chat with distinct AI personalities backed by **persistent per-user memory on a Memgraph knowledge graph** and MongoDB — sustaining coherent context across sessions at **200 peak concurrent users** on OpenAI and Gemini LLMs.
- Designed a LangGraph multi-agent architecture (memory, retrieval, reasoning, persona, summarization and orchestration agents); chose **Memgraph over Neo4j for in-memory traversal latency** to keep memory lookups off the critical path.

Software Development Trainee — Udyat Technologies, Mohali, India

Mar 2024 – Sep 2024

- Integrated GPT and Claude with backend APIs using RAG and prompt engineering; built an AI resume-parsing API (Tesseract OCR + NLP) for automated document processing.

TECHNICAL SKILLS

Languages, Backend & Databases: Python, SQL, FastAPI, REST APIs, async, Pydantic, Microservices, PostgreSQL, MySQL, MongoDB, Azure Cosmos DB

Generative AI & Agents: LLMs, Generative AI, Agentic AI, Multi-Agent Systems, RAG, GraphRAG, Prompt Engineering, NLP, Computer Vision, Multimodal AI

Frameworks & Tools: LangChain, LangGraph, Model Context Protocol (MCP), Hugging Face, PyTorch, OpenCV, Tesseract OCR, ffmpeg

Retrieval & Knowledge Graphs: Qdrant, Azure AI Search, embeddings, vector search, hybrid search, reranking, Memgraph, Neo4j

Cloud & MLOps: Microsoft Azure (Azure OpenAI, AI Search, AI Vision / Custom Vision, Document Intelligence, Container Apps, Functions, Blob Storage, API Management, Key Vault), Docker, Azure DevOps, CI/CD, Git

Models: OpenAI GPT, GPT Image, Anthropic Claude, Google Gemini, Gemini Omni, Veo, Seedance 2.5, ElevenLabs

Evaluation & Monitoring: Ground-truth benchmarking, confidence scoring, accuracy and error analysis, LLM evaluation, Azure Application Insights

EDUCATION

Bachelor of Engineering (Computer Science & Engineering) (Hons.) in (Artificial Intelligence & Machine Learning) In Association With IBM — Chandigarh University

2021 – 2025
